## GROUND PLANE ANTENNA

**Design Features:** AG-150 Ground Plane Antenna is rugged all weather model, uses high class chrome plated Brass and does not require any field tuning. The ground plane antenna when packed comes with ground radials removed from the antenna body for ease of packing and transportation.

**Constructions:** The all Brass ground plane antenna prevents formation of Signal Cells, thereby eliminating inter-modulation with in the antenna. AG-150 ground plane antenna is specially designed for Omni directional requirements, broadband for base station. Antenna termination and feed cable lie enclosed inside the mounting pipe for complete weather protection.
